

WHAT'S IN THE BOX

	Description		
0	Alloy accessory kit, P/N 109ACC-00	0	CBL 2M Ethernet 10BaseT CAT5, P/N 50150-00
2	Power supply, 65 W, 19 V, 3.43 A, 100-240 V AC, P/N 107000	8	Antenna 2.4 GHz stick antenna, SMA P/N 120030
8	Power cord kit – USA, EU, UK, AUS, with a C7 connector, P/N 78651	9	USB Mini-B Plug Host to A Jack accessory cable, P/N 74399-00
4	Power cord, 6 ft, Japan with a C7 connector, P/N 78656	0	USB Mini-B Plug to A Plug accessory cable, P/N 74408-00
6	1.5 m cable, DB9(F) Y to OS/7P/M to Power Jack, P/N 59044	0	Tripod clip, EM/TM3, P/N 41124 and Screws 6-32 x ¹ / ₄ 100FM BLK SS NYL, P/N 27953
0	1.8 m cable, DB9/M-DB9/F, Data, P/N 19309-00	0	Smart battery, P/N 76767

CONNECTING THE POWER CABLE (P/N 59044)

- 1. Remove the protection cap from either power port 3 or 4.
- 2. Remove the protection cap from the LEMO end of the cable.
- 3. Line up the red dot on the LEMO end of the cable with the red line on the LEMO socket of the respective power port3.
- 4. Insert the cable plug into the Alloy LEMO socket.
- 5. Connect the DC barrel connector to the power supply.

DISPLAY

	Description		Description
0	Serial number	5	Firmware version
2	IP address	6	Battery 1
3	Number of satellites and positioning mode	7	Battery 2
4	UTC date and time	8	Logging status

Rotating the display

- 1. From the **Home** screen, press **—**. The **System Setup** screen appears.
- 2. Press the down arrow until **Rotation** is highlighted. Press **I**.
- 3. Press 🛃 again. The **Rotation** setting is selected.

System Setup Language: Units: Brightn <mark>e</mark> ss:	English Meters 2
System Setup Units: Brightness: Rotation:	Meters 2 Normal
System Setup Units: Brightness: Rotation:	Meters 2 Normal

Setting up the Wi-Fi

- 1. From the **Home** screen, press **—**. The **System Setup** screen appears.
- 2. Press the down arrow key until **Wi-Fi Access Point** is highlighted. Press **I**.
- 3. Press again to activate the **Disable/Enable** setting. If the **Wi-Fi Access Point** is disabled, press the down key to change to **Enable**. Press at to save.
- 4. Press Esc twice to return to the Home screen.
- 5. Open a hand phone and navigate to the **System Settings** and **Wi-Fi** setup.
- Select the serial number of the current receiver (for example, AP 5737R0035) and click to connect. The encryption is WPA2 (usually automatic). The encryption type is AES (usually automatic). Type in the password abcdeabcde.

- 7. Press **OK**. The hand phone should be now connected to the Alloy receiver with a warning that there is "no Internet access".
- 8. Open a web browser on the hand phone. In the address bar, enter **192.168.142.1**. The Alloy web interface is now open on the phone.

Setting up the Ethernet

- 1. From the **Home** screen, press **I**. The **System Setup** screen appears.
- 2. Press the down arrow key until **Ethernet** is highlighted. Press **—**.
- 3. At **DHCP**, press **I**. The **DHCP** setting is selected. If required, disable/enable DHCP.
- If DHCP is disabled, using the arrow keys move to the IP Address field. Press I. Enter your IP address (for example, 10.3.36.218).
- 5. Using the arrow keys, move down to the **Netmask** field. Press **–**. Enter the required netmask.
- 6. Using the arrow keys, move down to the **Gateway** field. Press I. Enter the required gateway address.
- 7. When finished, press 🗾 once, then press **Esc** to return to the **System Setup** screen.
- 8. Restart the receiver for the changes to take effect.
- 9. Open a web browser on a computer connected to the LAN. In the address bar, enter your IP address (for example, **10.3.36.218**). The Alloy web interface appears.

Help is available in the web interface, or go to www.trimble.com/Support/Support_AZ.aspx and select **Alloy**.
